www.sar-tick.com

This product meets applicable national SAR limits of 2.0 W/kg. The specific maximum SAR values can be found on page 31 of this user guide.

When carrying the product or using it while worn on your body, either use an approved accessory such as a holster or otherwise maintain a distance of 1.5 cm from the body to ensure compliance with RF exposure requirements. Note that the product may be transmitting even if you are not making a phone call.

Prolonged exposure to music at full volume on the music player may damage the listener's hearing. Set your phone volume safely. Use only headphones recommended by TCT Mobile Limited and its affiliates.

Your mobile.....

1.1 Keys and connectors

(1) Depending on your model.

- On Home screen, press to quickly access the **Settings** menu or Notification panel; launch quick search; manage applications; or customize your Home screen by adding applications or by changing its wallpaper/theme.

- On other screens, press to view options list.
- Press: Return to the Home screen or back to the central Home screen if it is extended.

Press and hold: Enter the recently used applications list.

- Go back to the previous menu or screen.

- Press: Lock the screen
Light up the screen

Press and hold: When phone is off, power on the phone.
When phone is on, enter Phone options: Silent mode, Airplane mode, Power off.

Press to adjust the volume (in call/media playing mode)

- Open Search bar for searching within an application, the phone or web.

1.2 Getting started

1.2.1 Set-up

Removing or installing the back cover

Inserting or removing the SIM card

You must insert your SIM card to make phone calls. Please power off your phone and remove the battery before inserting or removing the SIM card.

Place the SIM card with the chip facing downwards and slide it into its housing. Make sure that it is correctly inserted. To remove the card, press and slide it out.

Installing or removing the battery

- Insert and click the battery into place, then close the phone cover.
- Unclip the cover, then remove the battery.

Installing and removing the microSD card

Insert the microSD card into the slot with the golden contact facing downwards. To remove the card, press and slide it out.

To avoid data loss and SD card damage, before removing the SD card, please ensure that the SD card is unmounted.

Charging the battery

Connect the battery charger to your phone and mains socket respectively.

To reduce power consumption and energy waste, when the battery is fully charged, disconnect your charger from the plug; switch off Wi-Fi, GPS, Bluetooth or background-running applications when not in use; reduce the backlight time, etc.

1.2.2 Power on your phone

Hold down the **Power** key until the phone powers on. It will take some seconds before the screen lights up.

Set up your phone for the first time

When you power on for the first time, you are prompted to set up a range of your phone's features: language, input method, mobile data connection, account setup and synchronization, system update, etc. You are required to sign into your Google account to synchronize email, contacts, calendar and other Google applications⁽¹⁾.

- Enter your user name and password, then touch **Sign in**. If you forget your password, you can go to <http://www.google.com/> to retrieve it. If you don't own a Google Account, you are prompted to create one by touching **Create**.
- Read the setup information on the screen.
- Mark/Unmark the check box to choose whether you want to take advantage of Google's location service, then touch **Next**.
- Mark/Unmark the check box to choose whether you want to back up data with your Google account, then touch **Next**.
- Touch **Finish setup**.

This initial set up can be skipped and enabled later via **Settings\Accounts & sync**.

While in the power on screen but with no SIM card inserted, you can still connect to a Wi-Fi network to sign into your Google account and use some features.

1.2.3 Power off your phone

Hold down the **Power** key from the Home screen until the phone options appear, select **Power off**.

⁽¹⁾ Application availability depends on country and operator.

1.3 Home screen

Your device provides two kinds of Home screens which are activated by two different launchers: ONE TOUCH launcher and Android launcher.

1.3.1 ONE TOUCH Home screen ⁽¹⁾

The ONETOUCH Home screen enables you to organize applications and folders directly from the Home screen itself. This allows you to keep your most frequently used applications accessible while structuring their content at the same time.

Normal mode

Carousel mode

- ① **Status bar**
 - Status/Notification indicators
 - Touch and drag down to open notification
- ② **Panels bar**
 - Slide left or right to view more available panels.
- ③ **Carousel button**
 - Touch to access 3D carousel mode
- ④ **Carousel screen**
 - Touch a panel to view details, return to Normal mode.
 - Use left or right gesture to move panels.
- ⑤ **Application tab**
 - Touch to open applications list.
- ⑥ **Add/Remove a carousel panel**
 - To add a carousel panel, touch and drag a panel from the panel bar to the centre of the 3D carousel area.
 - To remove a carousel panel, touch and drag the panel back to the top panel bar.
(See arrows on above picture.)

The Home screen is an extended user interface panel giving you up-to-date information at a glance, such as time, weather, calendar, upcoming appointments, next alarm, new messages, missed calls, new emails, etc. It also has a fully customizable layout where you can add your own favorite apps, folders, and widgets for one-touch access.

⁽¹⁾ The availability of this feature depends on your network operator or region.

1.3.2 Android Home screen

To switch to Android Home screen:

- Touch the Application tab from the Home screen
- Select **Settings** **Launcher selection**
- Mark the Android launcher checkbox
- Press **Home** key to go to the Android Home screen.

1.3.3 Using the touchscreen

Touch

To access an application, touch it with your finger.

Touch and Hold

To enter the available options for an item, touch and hold the item. For example, select a contact in Contacts, touch and hold this contact, an options list will then appear on screen.

Drag

Place your finger on the screen to drag an object to another location.

Slide/Swipe

Slide the screen to scroll up and down the applications, images, web pages... at your convenience.

Click

Similar to swiping, but flicking makes it move faster.

Pinch/Spread

Place the fingers of one hand on the screen surface and draw them apart or together to scale an element on the screen.

Rotate

Automatically change the screen orientation from portrait to landscape by turning the phone sideways to have a better screen view.

1.3.4 Status bar

From the status bar, you can view both phone status (to the right side) and notification information (to the left side). When the status bar is full, the "☰" icon will appear. Touch it to display hidden icons.

Status icons

| | | | |
|--|---------------------------------|--|----------------------------------|
| | GPRS connected | | Receiving location data from GPS |
| | GPRS in use | | Speakerphone is on |
| | EDGE connected | | Roaming |
| | EDGE in use | | No signal |
| | 3G connected | | Vibrate mode |
| | 3G in use | | Ringer is silenced |
| | HSPA (3G+) connected | | Phone microphone is muted |
| | HSPA (3G+) in use | | Battery is very low |
| | Connected to a Wi-Fi network | | Battery is low |
| | Bluetooth is on | | Battery is partially drained |
| | Connected to a Bluetooth device | | Battery is full |
| | Airplane mode | | Battery is charging |
| | Alarm is set | | Headset connected |
| | GPS is on | | Signal strength |
| | No SIM card installed | | |

Notification icons

| | | | |
|--|--|--|---|
| | New Gmail message | | Call in progress (green) |
| | New text or multimedia message | | Call in progress using Bluetooth headset (blue) |
| | Problem with text or multimedia message delivery | | Missed call |
| | New Google Talk message | | Call on hold |
| | New voicemail | | Call forwarding is on |
| | Upcoming event | | Uploading data |
| | Data is synchronizing | | Downloading data |
| | Problem with sign-in or synchronization | | An open Wi-Fi network is available |
| | microSD card is full | | Phone is connected via USB cable |
| | Connected to or disconnected from VPN | | Radio is on |
| | Song is playing | | System update available |
| | USB tethering is on | | Portable Wi-Fi hotspot is on |
| | Both USB tethering and portable hotspot are on | | Application update available |
| | More notifications are hidden | | |

Notification panel

Touch and drag down the Status bar or press **Menu** key and touch **Notifications** to open the notification panel. Touch and drag up to close it. From the Notification panel, you can open reminders indicated by notification icons, activate some functions or view wireless service information.

Touch to activate/
deactivate Wi-Fi, Bluetooth,
GPS, etc.
Slide left/right to view
more functions.

Touch **Clear** to clear all event-based notifications (other ongoing notifications will remain).

1.3.5 Lock/Unlock your screen

To protect your phone and privacy, you can press **Power** key once to lock the screen and you can also select **Settings** **Location & Security** **Set up screen lock** to lock the phone screen by creating a variety of patterns, a PIN or password, etc.

1.3.6 Application tab

Touch  from the Home screen to enter the applications list.

To return to the Home screen, press **Home** key.

Consult recently-used applications

To consult recently-used applications, you can press and hold the **Home** key from the Home screen. Touch an icon in the window to open the related application.

1.3.7 Volume adjustment

You can set alarm, media and phone ringtone volumes to your preference with the **Volume up/down** key, or **Settings** **Sound** menu.

1.4 Applications list

The Applications list contains all pre-embedded and newly installed applications.

To access the Applications list, touch the Application tab from the Home screen.

2 Text input

2.1 Using the Onscreen Keyboard

The Onscreen keyboard will display automatically when a program requires entering text or numbers.

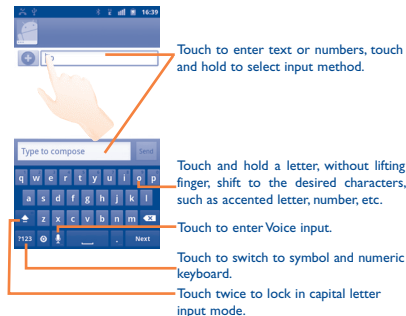

Onscreen keyboard settings

When you touch the Application tab from the Home screen and select **Settings\Language & keyboard\TouchPal keyboard** or **Android keyboard**, a series of settings become available for selection. In TouchPal keyboard, sliding the keyboard horizontally left and right produces, a set of different keyboard styles for your selection.

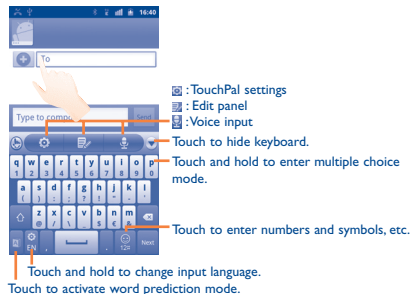

Adjust the onscreen keyboard orientation

Turn the phone sideways or upright to adjust the onscreen keyboard orientation. You can also adjust it by using additional settings (Touch Application tab from the Home screen, select **Settings\Display**).

2.1.1 Android keyboard

2.1.2 TouchPal keyboard

2.2 Text editing

You can edit the text you have entered.

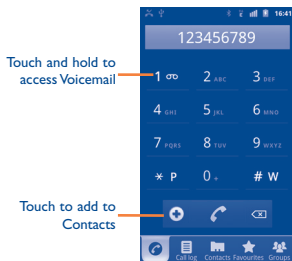

- Touch and hold text you have entered to display the options list.
- Select the text you want to edit by touching **Select text** or **Select all**.
- Touch and hold the highlighted text, and select the operation you need (**Copy**, **Cut**, etc.)

3 Phone call

3.1 Placing a call

You can easily make a call using **Phone**.

To Enter this menu, touch the Application tab from the Home screen and select **Phone**.

Enter the desired number from the keyboard directly or select a contact from **Contacts**, **Call log**, **Favourites** or **Groups** by touching tabs, then touch to place the call. The number you entered can be saved to **Contacts** by touching . If you make a mistake, you can delete the incorrect digits by touching .

To hang up a call, touch **End call**.

3.2 Answering or rejecting a call

When you receive an incoming call, drag down the green phone icon to answer. Decline the call by dragging up the red phone icon.

3.3 Consulting your call memory

You can access your call memory by touching the Application tab from the Home screen and touching **Call log** to view call history in categories of **Missed calls**, **Outgoing calls**, and **Incoming calls**.

4 Contacts.....

You can view and create contacts on your phone and synchronize these with your Gmail contacts or other applications on the web or on your phone.

When using **Contacts** for the first time you are required to add new contacts, import contacts from SIM card or synchronize contacts from other application accounts to the phone.

4.1 Adding a contact

Touch the Application tab on the Home screen, select **Contacts**, then press **Menu** key from contacts list screen and touch **New contact**.

4.2 Importing, exporting and sharing contacts

From the Contacts screen, press **Menu** key and touch **Import/Export**. From here you can exchange contacts between the phone and SD card or phone and SIM card.

You can share a single contact or contacts with others by sending the contact's vCard to them via Bluetooth, SMS, Email, etc.

Touch a contact you want to share, press **Menu** key and touch **Share** from the contact details screen, then select the application to perform this action.

4.3 Synchronizing contacts in multiple accounts

Contacts, data or other information can be synchronized from multiple accounts, depending on the applications installed on your phone.

Press **Menu** key from the contacts list screen, and touch **Accounts**.

5 Messaging.....

You can create, edit and receive SMS and MMS with this mobile phone.

To access this feature, touch the Application tab from the Home screen, then select **Messaging**.

All messages you receive or send out can be saved in the phone memory or SIM card. To consult messages stored in your SIM card, press **Menu** key from Messaging screen, then touch **Settings\Manage SIM messages**.

5.1 Write message

On the message list screen, touch **Compose new message** to write text/multimedia messages.

Touch to create new message

Touch to view the whole message thread

Sending a text message

Enter the mobile phone number of the recipient on **To** bar or touch  to add recipients, touch the **Type to compose** bar to enter the text of the message. When finished, touch **Send** to send the text message.

An SMS of more than 160 characters will be charged as several SMS. Specific letters (with accents) will also increase the size of the SMS, this may cause multiple SMS to be sent to your recipient.

Sending a multimedia message

MMS enables you to send video clips, images, photos, animations, slides and sounds to other compatible mobiles and e-mail addresses.

An SMS will be converted to MMS automatically when media files (image, video, audio, slides, etc.) are attached, a subject or email address is added, the maximum number of characters reached, etc.

6

Email

Besides your Gmail account, you can also set-up external POP3 or IMAP email accounts in your phone.

To access this function, touch the Application tab from the Home screen, then select **Email**.

An email wizard will guide you through the steps to set-up an email account.

- Enter the email address and password of the account you want to set-up.
- Touch **Next**. If the account you entered is not provided by your service provider in the phone, you will be prompted to go to the email account settings screen to enter settings manually. Or you can touch **Manual setup** to directly enter the incoming and outgoing settings for the email account you are setting up.
- Enter the account name and display name in outgoing emails.
- Touch **Done**.
- To add another email account, you can press **Menu** key and touch **Accounts** to access Email account screen. Press **Menu** key and touch **Add account** to create.

To create and send emails

- Press **Menu** key from Inbox screen, and touch **Compose**.
- Enter recipient(s)'s email address in **To** field, and if necessary, press **Menu** key and touch **Add Cc/Bcc** to include a copy or a blind copy to the message.
- Enter the subject and content of the message.
- Press **Menu** key, touch **Add attachment** to send an attachment to the receiver.
- Finally, touch **Send**.
- If you do not want to send the mail right away, you can touch **Save as draft** or press the **Back** key to save a copy.

7 Getting connected.....

To connect to the Internet with this phone, you can use GPRS/EDGE/3G networks or Wi-Fi, whichever is most convenient.

7.1 Connecting to the Internet

7.1.1 GPRS/EDGE/3G

The first time you turn on your phone with a SIM card inserted, it will automatically configure a network service: GPRS, EDGE or 3G.

To check the network connection you are using, touch Application tab from the Home screen, select **Settings\Wireless & networks\Mobile networks\Network settings\Network operators** or **Access Point Names**.

7.1.2 Wi-Fi

Using Wi-Fi, you can connect to the Internet when your phone is within range of a wireless network. Wi-Fi can be used on your phone even without a SIM card inserted.

To turn Wi-Fi on and connect to a wireless network

- Touch Application tab from the Home screen.
- Select **Settings\Wireless & networks\Wi-Fi**.
- Mark/Unmark the checkbox to turn on/off Wi-Fi.
- Touch **Wi-Fi settings**. The detailed information of any detected Wi-Fi networks is displayed in the Wi-Fi networks section.
- Touch a Wi-Fi network to connect. If the network you selected is secured, you are required to enter a password or other credentials (you may need to contact the network operator for details). When finished, touch **Connect**.

7.2 Browser.....

Using Browser, you can enjoy surfing the Web.

To access this function, touch Application tab from Home screen, then touch **Browser**.

To go to a web page

On Browser screen, touch the URL box at the top, enter the address of the web page, then touch .

7.3 Connecting to a computer via USB

With the USB cable, you can transfer media files and other files between your phone's microSD card and the computer.

To connect/disconnect your phone to/from the computer

To connect your phone to the computer:

- Use the USB cable that came with your phone to connect the phone to a USB port on your computer. You will receive a notification that the USB is connected.
- Open the Notifications panel and touch **USB connected**.
- Touch **Mount** in the dialog that opens to confirm that you want to transfer files.

To disconnect:

- Unmount the microSD card on your computer.
- Open the Notifications panel and touch **Turn off USB storage**.
- Touch **Turn off** in the dialog that opens.

To locate data you have transferred or downloaded in your microSD card

- Touch Application tab from Home screen to open the applications list.
- Touch **File Manager**.

All data you have downloaded are stored in **File Manager**, where you can view media files (videos, photos, music and others), rename files, install applications into your phone, etc.

7.4 Sharing your phone's mobile data connection

You can share your phone's mobile data connection with a single computer via a USB cable (USB tethering) or with up to eight devices at once by turning your phone into a portable Wi-Fi hotspot.

To turn on USB tethering or Portable Wi-Fi hotspot

- Touch Application tab from the Home screen.
- Select **Settings\Wireless & networks\Tethering & portable hotspot**.
- Mark the check box of **USB tethering** or **Portable Wi-Fi hotspot** to activate this function.

The functions may incur additional network charges from your network operator. Extra fees may also be charged in roaming areas.

7.5 Connecting your phone to a TV set

Using an HDMI (High Definition Multimedia Interface) cable, you can connect your phone to a TV set for better viewing.

To use this feature, please ensure that the checkbox has been marked on **Settings\Display\HDMI display**.

7.6 ONE TOUCH Share ⁽¹⁾

ONE TOUCH Share service enables you to share media files with DLNA (Digital Living Network Alliance) certified devices via a Wi-Fi network.

Your device supports DMC (Digital Media Controller) category only.

7.7 Direct connection to other Wi-Fi devices

The Wi-Fi Direct feature allows Wi-Fi devices to connect to each other without the need for a wireless access point.

To turn on/off Wi-Fi Direct

- Open the application list
- Select **Settings\Wireless & networks\Wi-Fi Direct**
- Mark/Unmark the checkbox to turn on/off Wi-Fi Direct.

8 Identify my location using GPS satellites

To activate your phone's global positioning system (GPS) satellite receiver:

- Touch Application tab from the Home screen
- Select **Settings\Location & Security\Use GPS satellites**
- Mark the checkbox

Your location will now be identified when you open Maps.

⁽¹⁾ With a Windows7 computer, using Windows Media Player (WMP), you can directly browse and play the media files.

Use your phone's GPS satellite receiver to pinpoint your location within an accuracy of as little as several meters ("street level"). The process of accessing the GPS satellite and setting your phone's precise location for the first time will require up to 5 minutes. You will need to stand in a place with a clear view of the sky and avoid moving. After this, GPS will only need 20-40 seconds to identify your precise location.

9 Data backup.....

This phone enables you to back up your phone's settings and other application data to Google Servers, using your Google Account.

If you replace your phone, the settings and data you've backed up are restored onto the new phone the first time you sign in with your Google Account.

To activate this function:

- Touch Application tab from the Home screen
- Select **Settings** | **Privacy** | **Back up my data**
- Mark the checkbox

Once this function is activated, a wide variety of settings and data are backed up, including your Wi-Fi passwords, bookmarks, a list of the applications you've installed, the words you've added to the dictionary used by the onscreen keyboard, and most of the settings that you configure with the Settings application. If you deactivate this option, you stop backing up your settings, and any existing backups are deleted from Google Servers.

10 Factory data reset.

To activate factory data reset:

- Touch Application tab from the Home screen
- Select **Settings** | **Privacy** | **Factory data reset**
- Mark the checkbox

Resetting the phone will erase all of your personal data from internal phone storage, including information about your Google Account, any other accounts, your system and application settings, and any downloaded applications. You can also mark the **Erase SD card** check box to erase all the data on your microSD card, such as music or photos. If you reset the phone in this way, you're prompted to re-enter the same kind of information as when you first started Android.

When you are unable to power on your phone, there is another way to perform a factory data reset by using hardware keys. Hold down **Volume up** key and press **Power** key at the same time until the screen lights up.

Applications.....

With this phone, some built-in Google applications and other third party applications ⁽¹⁾ are available for your convenience.

With the built-in applications, you can

- Communicate with friends
- Exchange messages or emails with friends
- Track your location, view traffic situations, search for locations and get navigation information to your destination
- Download more applications from Android Market

and more.

For more information about these applications, please check the user manual online: www.alcatelonetouch.com.

⁽¹⁾ Some pre-loaded third party apps are removable to free up more memory.

12 Making the most of your phone

You can download software upgrades for free from the website: www.alcatelonetouch.com.

12.1 Android Manager

The Android Manager includes:

- **Contacts**

It allows you to back up contact entries so that you don't have to worry about losing, breaking, switching phones or changing service providers.

- **Messages**

It frees you from painstakingly inputting text on the keypads. All of your messages are easily accessible and well-organized.

- **Photos**

It allows you to easily import photos from a PC or the handset and organize them in different albums for better management.

- **Videos**

It allows you to insert video files from a PC for playback and then upload to a handset folder.

- **Music**

It allows you to quickly search for your favourites on a PC, manage the ultimate Library, and enjoy the easiest digital jukebox in your own mobile way.

- **Application**

It allows you to import downloaded mobile applications and have them installed on your handset upon synchronization.

- **File**

It allows you to organize handset files - just a few clicks files on the handset can be where you want them to be.

- **Sync**

It allows you to synchronize the Contacts and Calendar in Outlook/Outlook Express with the handset.

Supported Operating Systems

Windows XP/Vista/Windows 7.

12.2 ONE TOUCH Upgrade

Using ONE TOUCH Upgrade tool you can update your phone's software from your PC.

Download ONE TOUCH Upgrade from ALCATEL website (www.alcatelonetouch.com) and install it on your PC. Launch the tool and update your phone by following the step by step instructions (refer to the User Guide provided together with the tool). Your phone's software will now have the latest software.

All personal information will be permanently lost following the update process. We recommend you backup your personal data using Android Manager before upgrading.

Supported Operating Systems

Windows XP/Vista/Windows 7.

Safety and use.....

We recommend that you read this chapter carefully before using your phone. The manufacturer disclaims any liability for damage, which may result as a consequence of improper use or use contrary to the instructions contained herein.

• **TRAFFIC SAFETY:**

Given that studies show that using a mobile phone while driving a vehicle constitutes a real risk, even when the hands-free kit is used (car kit, headset...), drivers are requested to refrain from using their mobile when the vehicle is not parked.

When driving, do not use your phone and headphone to listen to music or to the radio. Using a headphone can be dangerous and forbidden in some areas.

When switched on, your phone emits electromagnetic waves that can interfere with the vehicle's electronic systems such as ABS anti-lock brakes or airbags. To ensure that there is no problem:

- do not place your phone on top of the dashboard or within an airbag deployment area.
- check with your car dealer or the car manufacturer to make sure that the dashboard is adequately shielded from mobile phone RF energy.

• **CONDITIONS OF USE:**

You are advised to switch off the telephone from time to time to optimise its performance.

Switch the phone off before boarding an aircraft.

Switch the phone off when you are in healthcare facilities, except in designated areas. As with many other types of equipment now in regular use, mobile telephones can interfere with other electrical or electronic devices, or equipment using radio frequencies.

Switch the phone off when you are near gas or flammable liquids. Strictly obey all signs and instructions posted in a fuel depot, petrol station, or chemical plant, or in any potentially explosive atmosphere.

When the phone is switched on, it should be kept at least 15 cm from any medical device such as a pacemaker, a hearing aid or insulin pump, etc. In particular when using the phone, you should hold it against the ear on the opposite side to the device, if any.

To avoid hearing impairment, pick up the call before holding your phone to your ear. Also move the handset away from your ear while using the "hands-free" mode because the amplified volume might cause hearing damage.

Do not let children use the phone and/or play with the telephone and accessories without supervision.

When replacing the cover please note that your phone may contain substances that could create an allergic reaction.

Always handle your phone with care and keep it in a clean and dust-free place.

Do not allow your phone to be exposed to adverse weather or environmental conditions (moisture, humidity, rain, infiltration of liquids, dust, sea air, etc). The manufacturer's recommended operating temperature range is -10°C to +55°C.

At over 55°C the legibility of the phone's display may be impaired, though this is temporary and not serious.

Emergency call numbers may not be reachable on all cellular networks. You should never rely only on your phone for emergency calls.

Do not open, dismantle or attempt to repair your mobile phone yourself. Do not drop, throw or bend your mobile phone.

Do not use the phone if the glass made screen, is damaged, cracked or broken to avoid any injury.

Do not paint it.

Use only batteries, battery chargers, and accessories which are recommended by TCT Mobile Limited and its affiliates and are compatible with your phone model. TCT Mobile Limited and its affiliates disclaim any liability for damage caused by the use of other chargers or batteries.

Remember to make back-up copies or keep a written record of all important information stored in your phone.

Some people may suffer epileptic seizures or blackouts when exposed to flashing lights, or when playing video games. These seizures or blackouts may occur even if a person never had a previous seizure or blackout. If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult your doctor before playing video games on your phone or enabling a flashing-lights feature on your phone.

Parents should monitor their children's use of video games or other features that incorporate flashing lights on the phones. All persons should discontinue use and consult a doctor if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. To limit the likelihood of such symptoms, please take the following safety precautions:

- Do not play or use a flashing-lights feature if you are tired or need sleep.
- Take a minimum of a 15-minute break hourly.
- Play in a room in which all lights are on.
- Play at the farthest distance possible from the screen.
- If your hands, wrists, or arms become tired or sore while playing, stop and rest for several hours before playing again.
- If you continue to have sore hands, wrists, or arms during or after playing, stop the game and see a doctor.

When you play games on your phone, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. Follow the instructions to avoid problems such as tendinitis, carpal tunnel syndrome, or other musculoskeletal disorders.

Prolonged exposure to music at full volume on the music player may damage the listener's hearing. Set your phone volume safely.

Use only headphones recommended by TCT Mobile Limited and its affiliates.

• **PRIVACY:**

Please note that you must respect the laws and regulations in force in your jurisdiction or other jurisdiction(s) where you will use your mobile phone regarding taking photographs and recording sounds with your mobile telephone. Pursuant to such laws and regulations, it may be strictly forbidden to take photographs and/or to record the voices of other people or any of their personal attributes, and duplicate or distribute them, as this may be considered to be an invasion of privacy. It is the user's sole responsibility to ensure that prior authorisation be obtained, if necessary, in order to record private or confidential conversations or take a photograph of another person; the manufacturer, the seller or vendor of your mobile phone (including the operator) disclaim any liability which may result from the improper use of the mobile phone.

• **BATTERY:**

Before removing the battery from your phone, please make sure that the phone is switched off.

Observe the following precautions for battery use:

- Do not attempt to open the battery (due to the risk of toxic fumes and burns).
- Do not puncture, disassemble or cause a short-circuit in a battery.
- Do not burn or dispose of a used battery in household rubbish or store it at temperatures above 60°C.

Batteries must be disposed of in accordance with locally applicable environmental regulations. Only use the battery for the purpose for which it was designed. Never use damaged batteries or those not recommended by TCT Mobile Limited and/or its affiliates.

This symbol on your telephone, the battery and the accessories means that these products must be taken to collection points at the end of their life:

- Municipal waste disposal centres with specific bins for these items of equipment
- Collection bins at points of sale.

They will then be recycled, preventing substances being disposed of in the environment, so that their components can be reused.

In European Union countries:

These collection points are accessible free of charge.

All products with this sign must be brought to these collection points.

In non European Union jurisdictions:

Items of equipment with this symbol are not to be thrown into ordinary bins if your jurisdiction or your region has suitable recycling and collection facilities; instead they are to be taken to collection points for them to be recycled.

CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

• **CHARGERS**

Mains powered chargers will operate within the temperature range of: 0°C to 40°C.

The chargers designed for your mobile phone meet with the standard for safety of information technology equipment and office equipment use. They are also compliant to the ecodesign directive 2009/125/EC. Due to different applicable electrical specifications, a charger you purchased in one jurisdiction may not work in another jurisdiction. They should be used for this purpose only.

• **RADIO WAVES:**

Proof of compliance with international standards (ICNIRP) or with European Directive 1999/5/EC (R&TTE) is required of all mobile phone models before they can be put on the market. The protection of the health and safety for the user and any other person is an essential requirement of these standards or this directive.

THIS DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The guidelines were developed by an independent scientific organization (ICNIRP) and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg.

Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for this device model are:

| Maximum SAR for this model and conditions under which it was recorded. | | |
|--|-------------------------------|------------|
| Head SAR | UMTS 2100 + Wi-Fi + Bluetooth | 0.586 W/kg |
| Body-worn SAR | GSM 900 + Wi-Fi + Bluetooth | 0.596 W/kg |

During use, the actual SAR values for this device are usually well below the values stated above. This is because, for purposes of system efficiency and to minimize interference on the network, the operating power of your mobile device is automatically decreased when full power is not needed for the call. The lower the power output of the device, the lower its SAR value.

Body-worn SAR testing has been carried out at a separation distance of 1.5 cm. To meet RF exposure guidelines during body-worn operation, the device should be positioned at least this distance away from the body.

If you are not using an approved accessory ensure that whatever product is used is free of any metal and that it positions the phone the indicated distance away from the body.

Organizations such as the World Health Organization and the US Food and Drug Administration have stated that if people are concerned and want to reduce their exposure they could use a hands-free device to keep the phone away from the head and body during phone calls, or reduce the amount of time spent on the phone.

For more information you can go to www.alcatelonetouch.com. Additional information about electromagnetic fields and public health are available on the following site: <http://www.who.int/peh-emf>.

Your telephone is equipped with a built-in antenna. For optimal operation, you should avoid touching it or degrading it.

As mobile devices offer a range of functions, they can be used in positions other than against your ear. In such circumstances the device will be compliant with the guidelines when used with headset or USB data cable. If you are using another accessory ensure that whatever product is used is free of any metal and that it positions the phone at least 1.5 cm away from the body.

• LICENCES

microSD Logo is a trademark.

The Bluetooth word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by TCT Mobile Limited and its affiliates is under license. Other trademarks and trade names are those of their respective owners.

ONE TOUCH 995 Bluetooth QD ID B018738

TouchPal™ and CooTek™ are trademarks of Shanghai HanXiang (CooTek) Information Technology Co., Ltd. and/or its Affiliates.

The Wi-Fi Logo is a certification mark of the Wi-Fi Alliance.

Your device uses non-harmonised frequency and is intended for use in all European countries. The WLAN can be operated in the EU without restriction indoors, but cannot be operated outdoors in France.

DLNA®, the DLNA Logo and DLNA CERTIFIED® are trademarks, service marks, or certification marks of the Digital Living Network Alliance.

HDMI logo is a trademark of the High Definition Media Input standard.

Google, the Google logo, Android, the Android logo, Google Search, Google Maps, Gmail, YouTube, Android Market, Google latitude and Google Talk are trademarks of Google Inc.

Protection against theft ⁽¹⁾

Your telephone is identified by an IMEI (phone serial number) shown on the packaging label and in the phone's memory. We recommend that you note the number the first time you use your telephone by entering * # 0 6 # and keep it in a safe place. It may be requested by the police or your operator if your telephone is stolen. This number allows your mobile telephone to be blocked preventing a third person from using it, even with a different SIM card.

⁽¹⁾ Contact your network operator to check service availability.

Disclaimer

There may be certain differences between the user manual description and the phone's operation, depending on the software release of your telephone or specific operator services.

TCT Mobile shall not be held legally responsible for such differences, if any, nor for their potential consequences, which responsibility shall be borne by the operator exclusively.

This handset may contain materials, including applications and software in executable or source code form, which is submitted by third parties for inclusion in this handset ("Third Party Materials"). All third party materials in this handset are provided "as is", without warranty of any kind, whether express or implied, including the implied warranties of merchantability, fitness for a particular purpose or use/third party application, interoperability with other materials or applications of the purchaser and non-infringement of copyright. The purchaser undertakes that TCT Mobile has complied with all quality obligations incumbent upon it as a manufacturer of mobile devices and handsets in complying with Intellectual Property rights. TCT Mobile will at no stage be responsible for the inability or failure of the Third Party Materials to operate on this handset or in interaction with any other devices of the purchaser. To the maximum extent permitted by law, TCT Mobile disclaims all liability for any claims, demands, suits or actions, and more specifically – but not limited to – tort law actions, under any theory of liability, arising out of the use, by whatever means, or attempts to use, such Third Party Materials. Moreover, the present Third Party Materials, which are provided free of charge by TCT Mobile, may be subject to paid updates and upgrades in the future; TCT Mobile waives any responsibility regarding such additional costs, which shall be borne exclusively by the purchaser. The availability of the applications may vary depending on the countries and the operators where the handset is used; in no event shall the list of possible applications and software provided with the handsets be considered as an undertaking from TCT Mobile; it shall remain merely as information for the purchaser. Therefore, TCT Mobile shall not be held responsible for the lack of availability of one or more applications wished for by the purchaser, as its availability depends on the country and the operator of the purchaser. TCT mobile reserves the right at any time to add or remove Third Party Materials from its handsets without prior notice; in no event shall TCT Mobile be held responsible by any purchaser for any consequences that such removal may have on the purchaser regarding the use or attempt to use such applications and Third Party Materials.

Warranty.....

Your phone is warranted against any defect or malfunctioning which may occur in conditions of normal use during the warranty period of twelve (12) months ⁽¹⁾ from the date of purchase as shown on your original invoice.

Batteries ⁽²⁾ and accessories sold with your phone are also warranted against any defect which may occur during the first six (6) months ⁽¹⁾ from the date of purchase as shown on your original invoice.

In case of any defect of your phone which prevents you from normal use thereof, you must immediately inform your vendor and present your phone with your proof of purchase.

If the defect is confirmed, your phone or part thereof will be either replaced or repaired, as appropriate. Repaired phone and accessories are entitled to a one (1) month warranty for the same defect. Repair or replacement may be carried out using reconditioned components offering equivalent functionality.

This warranty covers the cost of parts and labor but excludes any other costs.

⁽¹⁾ The warranty period may vary depending on your country.

⁽²⁾ The life of a rechargeable mobile phone battery in terms of conversation time standby time, and total service life, will depend on the conditions of use and network configuration. Batteries being considered expendable supplies, the specifications state that you should obtain optimal performance for your phone during the first six months after purchase and for approximately 200 more recharges.

This warranty shall not apply to defects to your phone and/or accessory due to (without any limitation):

- 1) Non-compliance with the instructions for use or installation, or with technical and safety standards applicable in the geographical area where your phone is used,
- 2) Connection to any equipment not supplied or not recommended by TCT Mobile Limited,
- 3) Modification or repair performed by individuals not authorised by TCT Mobile Limited or its affiliates or your vendor,
- 4) Inclement weather, lightning, fire, humidity, infiltration of liquids or foods, chemical products, download of files, crash, high voltage, corrosion, oxidation...

Your phone will not be repaired in case labels or serial numbers (IMEI) have been removed or altered.

There are no express warranties, whether written, oral or implied, other than this printed limited warranty or the mandatory warranty provided by your country or jurisdiction.

In no event shall TCT Mobile Limited or any of its affiliates be liable for indirect, incidental or consequential damages of any nature whatsoever, including but not limited commercial or financial loss or damage, loss of data or loss of image to the full extent those damages can be disclaimed by law.

Some countries/states do not allow the exclusion or limitation of indirect, incidental or consequential damages, or limitation of the duration of implied warranties, so the preceding limitations or exclusions may not apply to you.

Troubleshooting.....

Before contacting the service centre, you are advised to follow the instructions below:

- You are advised to fully charge () the battery for optimal operation.
- Avoid storing large amounts of data in your phone as this may affect its performance.
- Use User Data Format and the ONE TOUCH Upgrade tool to perform phone formatting or software upgrading, (to reset User Data format, hold down **Volume up** key while simultaneously pressing the **Power** key). ALL User phone data: contacts, photos, messages and files, downloaded applications like APK games will be lost permanently. It is strongly advised to fully backup the phone data and profile via Android Manager before doing formatting and upgrading.

and carry out the following checks:

My phone is frozen or cannot switch on

- Check the battery contacts, remove and reinstall your battery, then turn your phone on
- Check the battery power level, charge for at least 20 minutes
- If it still does not work, please use User Data Format to reset the phone

My phone has not responded for several minutes

- Restart your phone by pressing and holding the **Power** key
- Remove the battery and re-insert it, then restart the phone

My phone turns off by itself

- Check that your keypad is locked when you are not using your phone, and make sure **Power** key is not accidentally activated while the keypad is unlocked.
- Check the battery charge level

My phone cannot charge properly

- Make sure you are using an Alcatel battery and the charger from the box
- Make sure your battery is inserted properly and clean the battery contact if it's dirty. It must be inserted before plugging in the charger
- Make sure that your battery is not completely discharged; if the battery power is empty for a long time, it may take around 20 minutes to display the battery charger indicator on the screen.
- Make sure charging is carried out under normal conditions (0°C to +40°C)
- When abroad, check that the voltage input is compatible

My phone cannot connect to a network or “No service” is displayed

- Try connecting in another location
- Verify the network coverage with your operator
- Check with your operator that your SIM card is valid
- Try selecting the available network(s) manually
- Try connecting at a later time if the network is overloaded

My phone cannot connect to the Internet

- Check that the IMEI number (press *#06#) is the same as the one printed on your warranty card or box
- Make sure that the internet access service of your SIM card is available
- Check your phone's Internet connecting settings
- Make sure you are in a place with network coverage
- Try connecting at a later time or another location

Invalid SIM card

- Make sure the SIM card has been correctly inserted
- Make sure the chip on your SIM card is not damaged or scratched
- Make sure the service of your SIM card is available

Unable to make outgoing calls

- Make sure you have dialed a valid number and touch 
- For international calls, check the country and area codes
- Make sure your phone is connected to a network, and the network is not overloaded or unavailable
- Check your subscription status with your operator (credit, SIM card valid, etc.)
- Make sure you have not barred outgoing calls
- Make sure that your phone is not in flight mode

Unable to receive incoming calls

- Make sure your phone is switched on and connected to a network (check for overloaded or unavailable network)
- Check your subscription status with your operator (credit, SIM card valid, etc.)
- Make sure you have not forwarded incoming calls
- Make sure that you have not barred certain calls
- Make sure that your phone is not in flight mode

The caller's name/number does not appear when a call is received

- Check that you have subscribed to this service with your operator
- Your caller has concealed his/her name or number

I cannot find my contacts

- Make sure your SIM card is not broken
- Make sure your SIM card is inserted properly
- Import all contacts stored in SIM card to phone

The sound quality of the calls is poor

- You can adjust the volume during a call by pressing the **Volume** key
- Check the network strength 
- Make sure that the receiver, connector or speaker on your phone is clean

I am unable to use the features described in the manual

- Check with your operator to make sure that your subscription includes this service
- Make sure this feature does not require an Alcatel accessory

When I select a number from my contacts, the number cannot be dialed

- Make sure that you have correctly recorded the number in your file
- Make sure that you have selected the country prefix when calling a foreign country

I am unable to add a contact in my contacts

- Make sure that your SIM card contacts are not full; delete some files or save the files in the phone contacts (i.e. your professional or personal directories)

My callers are unable to leave messages on my voicemail

- Contact your network operator to check service availability

I cannot access my voicemail

- Make sure your operator's voicemail number is correctly entered in “**My numbers**”
- Try later if the network is busy

I am unable to send and receive MMS

- Check your phone memory availability as it might be full
- Contact your network operator to check service availability and check MMS parameters
- Verify the server centre number or your MMS profile with your operator
- The server centre may be swamped, try again later

SIM card PIN locked

- Contact your network operator to obtain the PUK code (Personal Unblocking Key)

I am unable to connect my phone to my computer

- Install Alcatel Android Manager first of all
- Check that your USB driver is installed properly
- Open the Notification panel to check if the Android Manager Agent has activated
- Check that you have ticked the checkbox of USB debugging in **Settings\Applications\Development\USB debugging**

- Check that your computer meets the requirements for Alcatel Android Manager Installation
- Make sure that you're using the right cable from the box.

I am unable to download new files

- Make sure there is sufficient phone memory for your download
- Select the micro-SD card as the location to store downloaded files
- Check your subscription status with your operator

The phone cannot be detected by others via Bluetooth

- Make sure that Bluetooth is turned on and your phone is visible to other users
- Make sure that the two phones are within Bluetooth's detection range

How to make your battery last longer

- Make sure you follow the complete charge time (minimum 3 hours)
- After a partial charge, the battery level indicator may not be exact. Wait for at least 20 minutes after removing the charger to obtain an exact indication
- Switch on the backlight upon request
- Extend the email auto-check interval for as long as possible
- Update news and weather information on manual demand, or increase their auto-check interval
- Exit background-running applications if they are not being used for a long time
- Deactivate Bluetooth, Wi-Fi, or GPS when not in use

The phone becomes warm after prolonged calls, game playing, internet surfing or running other complex applications

- This heating is a normal consequence of the CPU handling excessive data. Ending above actions will make your phone return to normal temperature.
